Note(s)

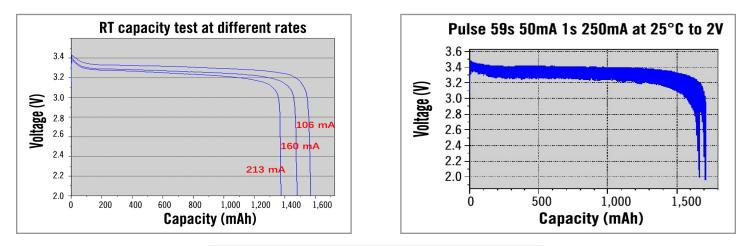

- 1. Varies according to pulse characteristics, temperature, cell history and the application. Consult Ultralife for exact performance under your pulse load.
- 2. Operation at extreme ranges (temperature or current) may lead to reduced capacity and lower voltage readings at beginning of pulses. Consult with Ultralife for your application.
- Exceeding the maximum temperature rating of 85°C may cause cell leaks, excessive expansion 3. of case hardware, and / or decomposition of case shrink wrap.
